

The image features a dark, textured wall made of small, dark rectangular blocks. A vertical brass rod is positioned in the center, with a horizontal brass bar attached to it. The floor is covered in a repeating geometric pattern of brass-colored tiles. The text 'Arch Plus Ultra' is centered in the lower half of the image, with a horizontal line and a small infinity symbol below it.

Esperia
table lamp

Xylia Collection

Esperia is the first creation of our collection and it encapsulates ArchPlusUltra values: noble materials, silky textures and timeless silhouettes. The base is crafted with Eucalyptus, which undergoes a heat treatment to achieve its streaked look and a velvety sensation to the touch. The bronze insert functions as a touch switch by means of a sensor dimming the led circuit. The whole composition is based on the golden ratio. MADE IN ITALY

Pollux
table lamp

Xylia Collection

The dynamic veins of the Zebrawood are the protagonist of Pollux, where the natural pattern of the timber meets the flow softness of the lampshade fabric, a silk jacquard. The matelassé technique of the embroidery enriches the textile surface and generates colorful shades, creating endless reflections according to the light. The bronze insert - a staple element in ArchPlusUltra collections - functions as a touch switch by means of a sensor dimming the led circuit.

Orphée Noir

table lamp

Xylia Collection

The elongated silhouette of Orphée Noir revolves around the contrast between the African ebony wood and the gentle fabric of the lampshade, meticulously balanced by means of an attentive design. The deep darkness of the top-quality ebony base is the perfect scenery for the handmade cast bronze switch to stand out.

The design involves the shadows as well, as the light reflections create a series of parallel squares on the ground.

Aldebaran

floor lamp

Xylia Collection

Aldebaran, the brightest star in the Taurus constellation, drives the inspiration for an elevated and fierce light source. The sharp geometry of the high prismatic column made in precious Macassar wood is supported by a patinated bronze base triangle, hand crafted in an high specialised artisanal workshop. The volume is completed at the top with a triangular lampshade. The irregular lines of the silk jacquard fabric breaks the satin sheen background like small waves on still water. Sales of this fabric will benefit Venetian Heritage in supporting the restoration of works of art in Venice. **MADE IN ITALY**

Mosaic Collection

Envie
table lamp

Mosaic Collection

Inspired by the roman and byzantine mosaic art, carefully hand crafted cubes in solid Ebony wood are assembled to create the five sides of Envie lamp base. Brass inlays placed at the edges complete the arrangement, holding together the final form. As hidden gems in this composition, five brass cubes function as touch switches allowing to dim the led circuit. The mosaic theme is echoed in the lampshade fabric as well, where a sequence of geometries creates an evocative pattern. MADE IN ITALY

Orion
table lamp

Mosaic Collection

A luminous sculpture born from contrast and precision. Orion table lamp is composed of meticulously crafted cubes of rare Ebony, assembled into a bold architectural base. Three brass cubes function as touch switches allowing to dim the led circuit. Topped with a silk shade that diffuses light with quiet elegance, Orion evokes celestial balance—raw materiality grounded by refined softness.

A statement of timeless craftsmanship and modern poise.

Gaia Collection

Ottavia
table lamp

Gaia Collection

Sculpted from exquisite Calacatta Viola marble, Ottavia lamp features an octagonal base and matching shade, echoing classical geometry with contemporary refinement. The bold veining of the marble makes each piece uniquely expressive, while the faceted form creates a play of light and shadow—an object of quiet strength and sculptural elegance.

Ottavia lamp is available also in natural travertine with a coordinating shade, blending architectural clarity with earthy elegance. The stone's subtle texture and warm tones bring a tactile softness to the bold geometric form, making each piece a timeless statement of refined simplicity.

Gaia Collection

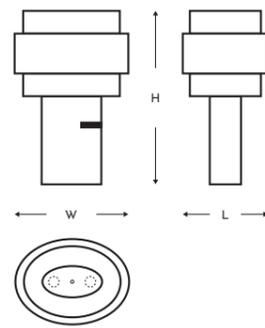

Auge
Table Lamp

Gaia Collection

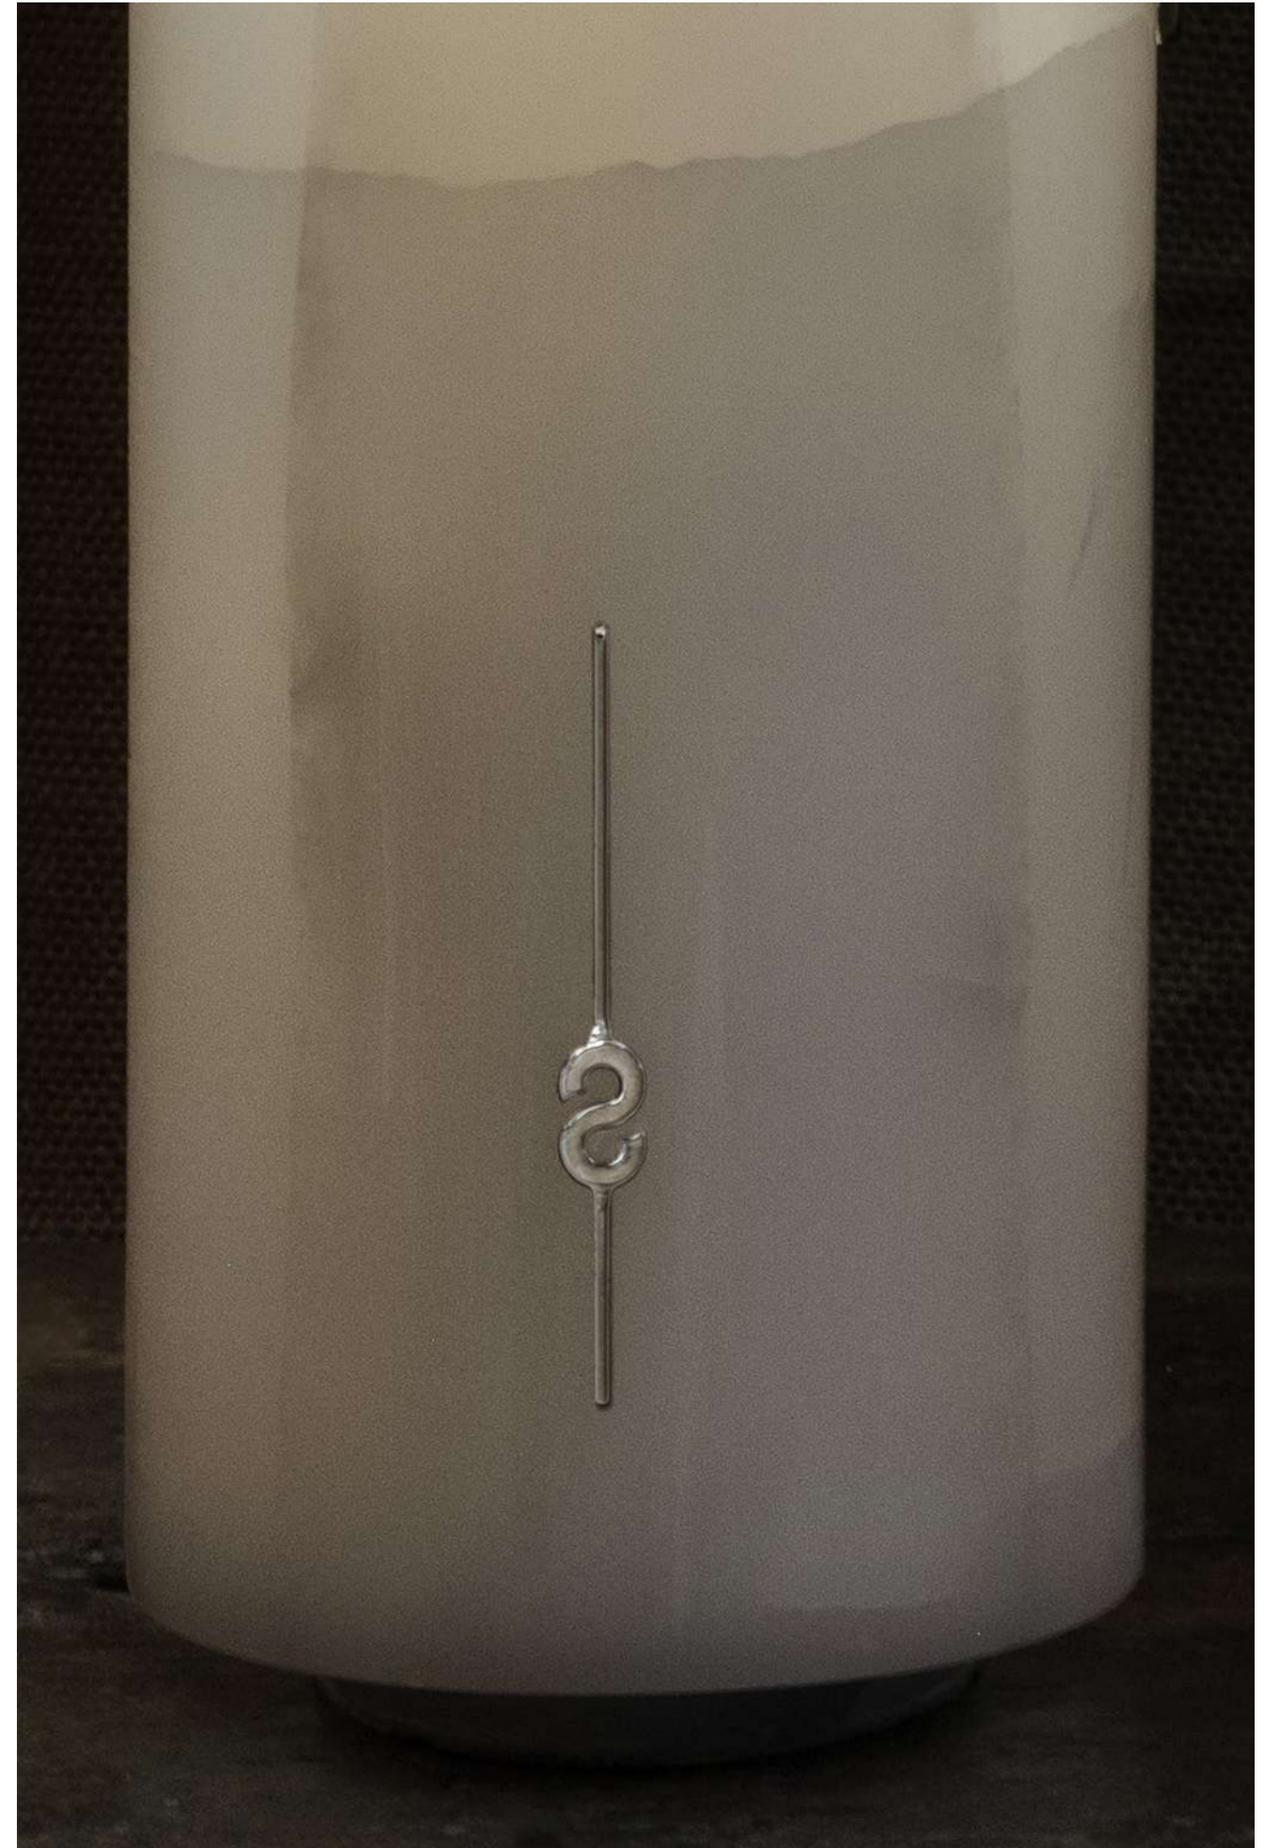

Auge - the apogee of the form. The celestial inspiration behind the conception of Auge echoes in the elliptical base carved from a block of solid - yet translucent - onyx. The base features its own independent light source, separate from the lampshade. As the light filters through the unique set of veins within each stone, it creates ever-changing patterns, making every piece one-of-a-kind. The lampshade completes the composition evoking the orbital trajectories of the eternal celestial bodies.
